

## SCREENSTRIP LIQUID (SST004)

### Main Characteristics

#### Product Characteristics

Liquid/Clear colour

#### Instruction for use

- For normal decoating, mix 1 Kg. of Screenstrip Liquid SST004 with 20 liters of water.
- Pour 1 kg of Screenstrip Liquid into a plastic bucket and 20 ltrs of water to obtain the optimum diluted strength.
- Where longer dwell times are used, a dilution level of up to 1:55 may be used.
- For tough stencils a lower dilution rate and stronger solution may be required.
- Avoid diluting in a ratio lower than 1:10 as a very strong solution may make decoating difficult.

Stencils can be decoated as follows:

- Ensure that the screen completely free from ink residues remain, use Screensolve SSO038 to clean the screen.
- Rinse both sides of the screen with water and allow to drain.
- Apply Screenstrip Liquid solution to both sides of the screen with a brush.
- Rub into the entire stencil area.
- Leave the screen for a few minutes, but do not allow product to dry.
- Wash the stencil with mains pressure water and then use a high-pressure water gun if required.
- Stubborn stains may require additional treatment with Screensolve SSO038.
- If any ink or stencil stains remain, Screenpaste & Screensolve or Chlorine should be used.
- Before the reclaimed screen is used again, it should be prepared with Degreaser P-6419.

### Features

- An economical concentrated liquid stripping solution which can then be diluted up to 1:30
- Suitable for machines of hand use.

### Standard Packing

25 Kg and 1 Kg

### Safety and Handling

- Is free from any toxic, carcinogenic, mutagenic and reprotoxic chemicals.
- Does not have a flashpoint and is, therefore, exempt from the Highly Flammable Liquid Regulations.
- SST004 should be used with care. Wear suitable PPE, for example, appropriate gloves and safety glasses.
- Should be stored away from children.
- Comprehensive information on *the Safety and Handling of Screenstrip Liquid* in Chaiyaboon Material Safety Data Sheet.

**Storage**

- Screenstrip Liquid should be stored in a cool dry place at 0 – 35 °C.
- SST004 can be stored for 36 months.
